I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 23, 2010 has been entered.

Information Disclosure Statement

The information disclosure statement submitted on October 23, 2010 has been considered by the examiner and placed of record in the application file.

Reasons for Allowance

Claims 1, 3-13, 15-25, 27-31, and 33-42 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to methods, apparatuses, and computer readable media for transmitting data in a code division multiple access (CDMA) communication network. In particular, applicants have invented a way to allocate a common Walsh code to a group of transceivers, the group of transceivers being grouped together based upon a mutual data rate, allocates a respective, different long code to each transceiver in the group, the long code being specific to the transceiver in the group and enables only the specific transceiver in the group to decode the data that was intended for said specific transceiver. In addition, the transmission of the data is time-multiplexed to the transceivers in the group by applying the common Walsh code and the respective long code of each transceiver to data packets directed to the transceivers so as

Art Unit: 2617

to form multiplexed data packets, and transmits the multiplexed data packets in sequence over the network to the group of transceivers. Moreover, the transceivers in the group have respective data throughput rates and transmitting the multiplexed data packets comprises identifying a specific transceiver in the group having the minimum data throughput rate among the data throughput rates of the transceivers in the group, and applies the respective long code to transmit at least one multiplexed data packet to the specific transceiver.

Applicant's independent claims 1, 7, 13, 19, 25, 31, and 37 each recite, inter alia, wherein the transceivers in the group have respective data throughput rates and transmitting the multiplexed data packets comprises identifying a specific transceiver in the group having the minimum data throughput rate among the data throughput rates of the transceivers in the group, and applying the respective long code to transmit at least one multiplexed data packet to the specific transceiver. Gopalakrishnan, Narasimhan, and Ling disclose various aspects of applicant's claimed invention but fail to teach wherein the transceivers in the group have respective data throughput rates and transmitting the multiplexed data packets comprises identifying a specific transceiver in the group having the minimum data throughput rate among the data throughput rates of the transceivers in the group, and applying the respective long code to transmit at least one multiplexed data packet to the specific transceiver. After a thorough search, the examiner was unable to find this particular feature in the prior art. In addition, it would not have been obvious to piece this particular feature with the other applied art unless one was using the applicant's claims and specification as a roadmap, thus practicing impermissible hindsight. Applicant's claims 1, 7, 13, 19, 25, 31, and 37 comprise a particular combination of elements, which is neither taught nor suggest by the prior art.

Accordingly, applicant's invention is allowed for these reasons as well as applicant's amendments and arguments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
